NYSPFP Pressure Injury Webinar

Best Practices for Prevention and Documentation

September 10, 2019

*A partnership of the Healthcare Association of New York State
and the Greater New York Hospital Association
in collaboration with IPRO*

Agenda

Topic	Speaker
Welcome and Introductions	NYSPFP Staff
Updates on Pressure Injury Prevention Measures and Methods	William V. Padula, PhD
Pressure Injury Prevention: Quality & Improvement for Best Practices & Success	Barbara Delmore, PhD, RN, CWCN, MAPWCA, IIWCC-NYU
Hospital Questions and Next Steps	NYSPFP Staff

NYSPFP Pressure Injury Initiative

- Goal: To reduce the prevalence of pressure injuries by 20%
- Current State:
 - Pressure Injury HAC is increasing in NYS
- Multifactorial contributing factors:
 - Conversion to ICD-10 in 2015
 - PI stage 2 and 3 definition changes in 2016
 - Progression or worsening of a PI to a new stage (example - from a stage 2 to stage 3) is considered a new hospital-acquired PI now impacting the hospital PI rate
 - Aging population and increasing chronic disease
 - Wound misinterpretation, documentation deficiency, miscoding

Pressure Injuries of Stage 2 or higher

Prevalence rate of facility-acquired pressure injuries of Stage 2 or higher per 100 patients

Baseline (Jan 14 – Dec 14)	Comparison (Jan 19 – Mar 19)	% Improvement
1.442	1.874	-30%

E-Learning: Preventing Pressure Injuries

- Self-paced on demand learning
- Located on the NYSPFP website
- This program covers:
 - Identify important roles for skin and risk assessment
 - How pressure injury forms – intensity and duration of pressure
 - Nursing interventions that reduce pressure injuries

RCIP for Pressure Injury

- Rapid Cycle Improvement Project (RCIP)
- Hospital specific project support with a full day tracer visit including:
 - Team opening meeting
 - Observation/data collection
 - Exit session
 - Detailed post report with positive findings, opportunities, and suggested tools and resource recommendations
