

## New York State Partnership for Patients

## Accelerating Improvement Patient Safety Commitments

Team Planning Worksheet

PATIENT SAFETY COMMITMENTS	KEY STRATEGIES	HOSPITAL-ACQUIRED COMPLICATIONS IMPACTED
<b>Expand Interdisciplinary Teams to Include Clinical Pharmacists to Reduce Adverse Events</b>	<ul style="list-style-type: none"> <li>• Include pharmacists in the medication reconciliation process on admission and at discharge.</li> <li>• Convene a pharmacy-driven anticoagulation management team.</li> <li>• Convene a pharmacy-driven insulin management team.</li> </ul>	<ul style="list-style-type: none"> <li>• Preventable Readmissions</li> <li>• Adverse Drug Events (ADE)</li> <li>• Venous Thromboembolism (VTE)</li> <li>• Injuries From Falls and Immobility</li> </ul>
<b>Implement “Hard Stops” or Reliable “Soft Stops” for Hardwiring Quality and Patient Safety Processes</b>	<ul style="list-style-type: none"> <li>• <b>Early Elective Delivery Hard Stop:</b> Implement a hard stop policy when an attempt is made to schedule an elective delivery in women of 36 0/7 to 38 6/7 weeks gestation without a medical or obstetrical indication.</li> <li>• <b>Catheter-associated Urinary Tract Infections (CAUTI) Hard Stop:</b> Implement hard stop policies for catheter insertion that is not medically necessary and timely discontinuation. Essential elements of the policies should include: <ul style="list-style-type: none"> <li>• assurance that all emergency department insertions are medically necessary;</li> <li>• requirement of ongoing nursing assessment of the need for a line/catheter including at the time of transfer (example: transfer out of critical care or the operating room with prompt discontinuation protocol); and</li> <li>• implement a physician-ordered, nurse-driven catheter removal protocol.</li> </ul> </li> <li>• <b>Medication Management Hard Stop:</b> Implement a hard stop to eliminate all discrepancies before finalizing medication reconciliation at discharge.</li> </ul>	<ul style="list-style-type: none"> <li>• Early Elective Delivery (EED)</li> <li>• CAUTI</li> <li>• Central Line-associated Bloodstream Infections (CLABSI)</li> <li>• ADE</li> <li>• Preventable Readmissions</li> </ul>

PATIENT SAFETY COMMITMENTS	KEY STRATEGIES	HOSPITAL-ACQUIRED COMPLICATIONS IMPACTED
<b>Adopt, Implement, and Effectively Use a Safe Surgery Checklist That Includes a Brief and Debrief with the Full Team</b>	<ul style="list-style-type: none"> <li>• Ensure that the hospital's Safe Surgery Checklist (SSC) is up to date and includes processes for pre-, intra-, and post- surgery phases. SSC should include the SSI bundle elements and should address antibiotics, normothermia, glucose control, and any other potential complication risks.</li> <li>• Implement a process for comprehensive pre-operative briefs with the full team.</li> <li>• Institute a process for timely and comprehensive debriefing that includes the entire team.</li> <li>• Promote the adoption and use of critical language to encourage a culture of patient safety (i.e., TeamSTEPPS).</li> </ul>	<ul style="list-style-type: none"> <li>• Surgical Site Infections (SSI)</li> <li>• CAUTI</li> <li>• Injuries From Falls and Immobility</li> <li>• ADE</li> <li>• Pressure Ulcers (PU)</li> </ul>
<b>Promote Innovative Practices in Ventilator Care and Management to Prevent Harm</b>	<ul style="list-style-type: none"> <li>• Implement protocols to mobilize or increase the activity level of patients on a ventilator.</li> <li>• Implement protocols to reduce or eliminate the use of sedation.</li> <li>• Promote effective use of medications for pain management.</li> </ul>	<ul style="list-style-type: none"> <li>• Ventilator-associated Events (VAE)</li> <li>• ADE</li> <li>• PU</li> </ul>
<b>Implement Patient-Centered Practices to Improve Patients' Experience of Care</b>	<ul style="list-style-type: none"> <li>• Use white boards as a shared communication tool.</li> <li>• Implement a process that includes patients and families in bedside reports.</li> <li>• Implement purposeful rounding.</li> <li>• Utilize rounding for periodic leadership safety review, discharge planning, etc.</li> <li>• Adopt and implement daily goal worksheets.</li> <li>• Develop and implement protocols for structured hand-offs.</li> <li>• Perform daily high-risk and prevention assessments.</li> <li>• Promote the use of critical language to encourage a culture of patient safety (i.e., TeamSTEPPS).</li> </ul>	<ul style="list-style-type: none"> <li>• Injuries From Falls and Immobility</li> <li>• PU</li> <li>• Preventable Readmissions</li> <li>• CAUTI</li> <li>• CLABSI</li> </ul>
